

Ms. Tony O Byrne,  
**Netcore Solutions Ltd,**  
Craggs Road,  
Barrigone,  
Askeaton,  
Co. Limerick.

Dear Tony,

RE: Time Recording Requirements

Further to our recent conversations, I now enclose the details as requested.

As mentioned, there are a number of factors that will influence the overall cost and also the implementation time. The basic clock card solution starts at €295 plus vat which includes 1,000 cards and a card rack. Based on our conversation however the PC linked solution would be the preferred solution.

In **Quotation A** I have outlined the basic system cost *excluding* Training and Installation on site. I would send down the clock and someone can mount this on the wall in the area required and we can configure the software and provide training online via remote software.

In **Quotation B** I have outlined the basic system cost *including* Training and Installation on site. We would install the clock and provide training in Limerick.

In **Quotation C** I have outlined the cost for the Terminals on their own

In relation to the terminals, there are two options if you do not want to have cards and they are 1. Fingerprint 2. Hand Scanner. With both options they can either be (A) USB collection (B) Hardwired or (C) TCP/IP via network connection.

I trust the enclosed proves satisfactory at this stage and I look forward to speaking to you soon to progress the subject further and to arrange further presentations of the software.

Kind regards for now,

**Nick Fingleton**
